

Intro for: Bob Pliskin
 Vice President
 Bradford Industries
 Fire and Thermal Protection Group

About 10 years ago Bob retired from his career as an innovative problem solver in the Health and Human Services arena where he was one of the developers of the German Measles Vaccine; designed, built and ran 5 hospitals for 20 years, and was instrumental in designing the first computerized Child Support Enforcement System and the first Electronic Benefits Transfer System for the distribution of Medicaid, Welfare and Food Stamps in the US.

Since that time he has devoted his energies to certain aspects of Fire Safety. He has consulted with and for the National Fire Protection Assn., the National Association of State Fire Marshals, The International Association of Fire Marshals, the Fire Chiefs Assn., The Consumer Product Safety Commission and 9 state legislatures.

About four yearss ago he assisted Bradford Industries to develop and market the first and only active-refractory intumescent thin-film coatings which are now being incorporated into the airlines military and high risk housing.
